

# TREY KEMP

## FULL-STACK WEB DEVELOPER

### SUMMARY

#### About Me

After graduating from DevPoint Labs and discovering my passion for web development, I couldn't get enough. I immediately continued my journey into web development by immersing myself in courses online as well as working on websites for family and friends. I am excited to continue learning and challenging myself in this new field and I am looking forward to bringing that passion to a full-time role.

### EXPERIENCE

Feb  
2021  
|  
April  
2021

2021  
|  
May  
2021

#### Hackathon Grader

<https://dpi-hackathon-grader.herokuapp.com/>

Hackathon Grader is an app that allows Web Development Teachers and staff organize, create, grade, and archive Hackathon competitions.

As a contributing developer I wrote the code for the following functionality:

- Add, update, delete Students/Teams
- Landing Page (where user logs in and registers)
- Profile Page/ Edit Profile
- Navigation Bar
- Assisted in styling throughout the application

2021

#### Player Trader

[https://github.com/maxmanayan/player\\_trader](https://github.com/maxmanayan/player_trader)

Player Trader is a one stop shop for buying and selling your players, from Ronaldo to Messi, you can buy anyone if your pocket is deep enough.

As a contributing developer I wrote the code for the following functionality:

- Jobs Page Frontend and Backend
- Update,edit,delete Jobs
- New Job Form
- Assisted in styling throughout the application
